- Team Collaboration

### Summary

Hello, I'm Leandro González. I am 23 years old; I am a software engineer. I am passionate about facing new challenges and finding creative solutions through software development. I have experience as a freelancer working in the roles of Fullstack developer, Backend developer and Mobile Developer (React Native | Expo).

### Work Experience

- PhylUCI [Bioinformatic Platform]**  
 OnSite | Lead Backend Developer  
 Bioinformatics services platform, analysis, sequence running and alignment, 3D visualization of proteins and nucleic acids, work with subprocesses and multithreads, creation of workers, asynchronous programming. On the platform, users will be able to manage their activities and classify them either by projects or others, as well as access their history.
- FaztGrab [E-Commerce]**  
 Freelancer | Backend Developer  
 I played the role of backend developer for the Fazt Grab taxi platform where I acquired a lot of experience with teamwork and, above all, technical knowledge of microservices architecture, consumption of external APIs, analysis, design and development of SQL databases (Postgre), construction of rest APIs and great mastery within the django framework.
- Mascolive [Vetrinary Clinic]**  
 Freelancer | Backend Developer  
 Application for workflow control and business management created for the Macolive veterinary clinic located in Playa, Havana, where I developed the role of backend development leader, implementing good practices to process information safely and quickly. In addition to creating real-time graphs to track the flow and control of the company based on statistics.
- Nao [Bar-Restaurant]**  
 Freelancer | Desktop App Developer  
 I played the role of fullstack developer, UI/UX designer, and database administration and creation in the construction of the full management desktop application for the digitalization of the Nao bar-restaurant. Gaining great experience working with an end client and mastery of technologies such as PyQt, MySQL, and Figma.

### Skill and Tools
